

PLANNING A PREMIUM ALUMINUM FENCING SYSTEM

Peak AQUATINE™PLUS Aluminum Fencing is a versatile component-based system that is simple to assemble and customize.

- **Maximum post spacing:**
6' 2 5/8" on center for a picket fence system.
3' 10 5/8" on center for a glass panel fence system.
- **For pool fences:**
The opening between pickets, or a picket and a post must not exceed 3 15/16".
The opening between a glass panel and a post must not exceed 1 1/2".
Follow local codes for minimum fence height and other specified requirements.
- **Always understand and comply with your local building codes.**

1 Use the grid below to plan your project.
