**Mid/End/Stair** Fascia Mount Bracket

**Fascia Mount Bracket**

**Installation Instructions**

**Tools required:**
- Drill & 3/16” drill bit
- 7/16” & 9/16” Ratchet & sockets
- 7/16” wrench
- Phillips screwdriver
- Level
- Measuring tape
- Hammer
- Wood saw
- Pencil
- Safety glasses
- Appropriate safety harness
- 2” x 8” lumber
- 3 1/4” common spiral nails

**Blocking material required:**

1 - Fascia Mount Base Rail Support

**Fasteners included:**

- 4 - Machine bolts with washers & locking nuts
- 6 - Lag bolts with washers
- 2 - Wood screws

**Important**

**WARNING** No representation or warranty is given that your particular application of these products complies with relevant building codes or that the fasteners provided or used are appropriate for your application. Therefore consult with professionals and local building officials before beginning work: (i) to ensure compliance with relevant building codes for your application and for your proposed use of fasteners; (ii) to ensure the integrity of the structural components in connection with which these products are to be used; (iii) to identify appropriate safety gear that is to be used during installation such as a safety harness when working above ground; (iv) to ensure that the work area is free from utilities, services and hazards; and, (v) to clarify any instructions or warnings that may not be clear. Work in a safe manner wearing protective gear such as gloves, eyewear, headwear, footwear and clothing. When using tools always comply with operation manuals and instructions. Metal and glass may have sharp edges and could fragment or splinter during or as a result of handling or cutting. Do not use these products in connection with any substance that is or may be harmful or corrosive to the products. Inspect and maintain these products and the structural components that they are used in connection with on a regular basis using professionals when appropriate.

No member of The Peak Group of Companies (as defined at www.peakproducts.com) shall be liable for any loss or damage resulting from the improper installation or use of this product. In the unlikely event that any member of The Peak Group of Companies becomes liable for any loss or damage, the aggregate liability shall be limited to the retail purchase price of the product.

---

1. Determine the quantity of fascia mount brackets you will need using the RailBlazers® Aluminum Railing System Layout Planner. (Available in-store or at www.railblazers.ca)

**IMPORTANT** Follow maximum post spacing information on Layout Planner.
1. Add blocking to deck structure where fascia mount brackets will be attached, according to blocking patterns A, B, or C below.

<table>
<thead>
<tr>
<th>Pattern</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>3 - 2&quot; x 8&quot;</td>
</tr>
<tr>
<td>B</td>
<td>2 - 2&quot; x 8&quot;</td>
</tr>
<tr>
<td>C</td>
<td>1 - 2&quot; x 8&quot;</td>
</tr>
</tbody>
</table>

2. Remove the cover, fasteners and base rail support from the inside of the bracket.

3. Starting at one end of the railing, hold the first fascia mount bracket in position ensuring that the top of the bracket is level with the deck surface. Mark the position of the 6 fastener holes on the fascia board.

4. Place the bracket back into position and attach the bracket to the fascia board using the 6 - 3/8" x 3" lag bolts supplied. Ensure that the top of the bracket is level and plumb (shim as necessary).
7. Attach the post to the fascia mount bracket using the 4 - 1/4” x 1 1/2” machine bolts, washers and locking nuts supplied. Ensure post is plumb (shim as necessary).

8. Install the cover on the bracket.

9. Attach remaining brackets to deck structure following steps 3-6 above.
   **IMPORTANT** Use the Fascia Mount Base Rail Support when installing base rail(s).

10. Follow the RailBlazers® Aluminum Railing System Installation Guide (available in-store or at www.railblazers.ca) for the remainder of the installation.
